02 / PROBLEM

Skills are everywhere. The right connection isn't.

Finding, agreeing and proving a useful exchange is the hard part.

**Scattered discovery**

Chats, posts and DMs — no single place to search by skill, language or outcome.

**Non-reciprocal wants**

A wants Guitar, C wants Python — a direct swap fails. Two people $\neq$ a match.

**Messy agreement**

Different time zones, languages, durations and no conflict check → missed lessons.

**No proof of learning**

Attendance alone doesn't show what was built, reviewed or remembered.

Not a reciprocal match → needs a 3-person loop

03 / SOLUTION

One place to discover, agree, learn and get recognized.

Share something you know, learn something you need — and keep a record.

Three ways to arrange a lesson

Free session**Direct swap****Paid mentorship***

* demo credits (100 start) · 15-min hold · no real money

- Publish a skill: title, outcome, tags, duration, delivery, proof link.
- Discover: search title/description/tag/@username + filters.
- Coordinate: requests, counter-time, chat (polling), meeting link.
